Cs506 lec2

Commits needs to be general enough and small enough at the same time

Git status

Git push origin name of the branch (origin master)

Git log

Remove commit git rebase -i sdasdasdasdasdasdasd

Wq quit

Git fetch get the changes from github

Git rebase origin/master to get the the changes

Git diff

Fork and make ones own changes

Fetch + merge make sure my own copy is in sync with the main repository

Don't commit anything to the master brach and make a new branch while developing new futures

Git remote add upstream link

Git checkout -b docs create a new branch called docs

Code. Open a code editor
